EXPERIENCE

Full-Stack Developer — Callsmaster
June 2023 – Present | New Delhi, India

- Owned end-to-end development of production web and mobile applications across frontend, backend, databases, authentication, payments and deployment.
- Built backend services and REST APIs using Node.js and Express with PostgreSQL, MySQL and MongoDB, using modular application architecture.
- Reduced dashboard and page-load latency by 30–40% through SSR, database query optimization, indexing, lazy loading, code splitting and caching.
- Integrated PayU, Razorpay and 5+ third-party services into transaction workflows, including webhook processing and API orchestration supporting ~1,500 monthly transactions.
- Implemented JWT authentication and role-based access control across 10+ modules, with reusable middleware and authorization flows.
- Developed Chrome Extensions serving 15,000+ monthly users, improving runtime performance, memory efficiency and browser compatibility.
- Delivered production features across React, Next.js, Node.js and React Native in Agile development cycles, collaborating across product and engineering requirements.

PROJECTS

Fitclub Gym CRM
Node.js, Express, PostgreSQL, React, Tailwind | July 2024 – Feb 2026

- Built a gym management platform covering membership, attendance, billing and administration for ~10,000 member records.
- Implemented JWT/RBAC, Razorpay payments and secure file uploads across core modules.
- Optimized PostgreSQL queries and API flows, improving dashboard performance by 35%+.

Rishtey — Matchmaking Platform
Next.js, Node.js, MySQL, Sequelize | July 2023 – Nov 2025 | NCR

- Developed profiles, matchmaking, subscriptions and onboarding workflows for ~8,000 user profiles.
- Implemented PayU subscriptions, JWT authentication and backend APIs for premium workflows.
- Reduced page-load time by 35%+ through SSR, query optimization and lazy loading.

Live Gold Rates App
React Native, Redux Toolkit, REST APIs | Aug 2023

- Built a cross-platform mobile application for real-time gold/silver tracking, pricing calculations and jewelry-business catalog workflows.
- Implemented administration and inventory features with optimized state management and API usage.

The Thai Tourism Platform
Next.js, React, Express, PostgreSQL, TanStack Query

- Built reusable City, Product, and Attraction pages using Next.js and React, delivering responsive interfaces across 10+ tourism sections.
- Developed Taxi Transfer REST APIs with Express.js and PostgreSQL for booking, search, and transfer management.
- Integrated TanStack Query for server-state management and caching,reducing redundant API calls by 30%.
